Progressive Web App

Performance

Metrics

▲ First Contentful Paint	8.5 s	▲ First Meaningful Paint	9.9 s
▲ Speed Index	23.2 s	▲ First CPU Idle	9.9 s
▲ Time to Interactive	10.1 s	■ Max Potential First Input Delay	240 ms

Values are estimated and may vary. The performance score is based only on these metrics.

Opportunities — These suggestions can help your page load faster. They don't directly affect the Performance score.

Opportunity	Estimated Savings
▲ Eliminate render-blocking resources	10.52 s
▲ Reduce server response times (TTFB)	7 s
▲ Serve images in next-gen formats	1.35 s

▲ Defer offscreen images	0.9 s
■ Remove unused CSS	0.6 s
■ Efficiently encode images	0.45 s
■ Properly size images	0.15 s
■ Minify JavaScript	0.15 s

Diagnostics — More information about the performance of your application. These numbers don't [directly affect](#) the Performance score.

▲ Ensure text remains visible during webfont load	
▲ Serve static assets with an efficient cache policy — 22 resources found	
▲ Minimize main-thread work — 5.0 s	
▲ Avoid an excessive DOM size — 1,574 elements	
■ Reduce JavaScript execution time — 1.6 s	
● Avoid chaining critical requests — 65 chains found	
● Keep request counts low and transfer sizes small — 170 requests • 2,388 KB	

Passed audits (9)

Accessibility

These checks highlight opportunities to [improve the accessibility of your web app](#). Only a subset of accessibility issues can be automatically detected so manual testing is also encouraged.

Names and labels — These are opportunities to improve the semantics of the controls in your application. This may enhance the experience for users of assistive technology, like a screen reader.

▲ Buttons do not have an accessible name

▲ Form elements do not have associated labels

▲ Links do not have a discernible name

Contrast — These are opportunities to improve the legibility of your content.

▲ Background and foreground colors do not have a sufficient contrast ratio.

Best practices — These items highlight common accessibility best practices.

▲ [id] attributes on the page are not unique

▲ [user-scalable="no"] is used in the <meta name="viewport"> element or the [maximum-scale] attribute is less than 5.

Tables and lists — These are opportunities to improve the experience of reading tabular or list data using assistive technology, like a screen reader.

▲ Lists do not contain only elements and script supporting elements (<script> and <template>).

▲ List items () are not contained within or parent elements.

Additional items to manually check (11) — These items address areas which an automated testing tool cannot cover. Learn more in our guide on [conducting an accessibility review](#).

Passed audits (5)

Not applicable (22)

Best Practices

- ▲ Does not use passive listeners to improve scrolling performance
- ▲ Links to cross-origin destinations are unsafe
- ▲ Includes front-end JavaScript libraries with known security vulnerabilities — 2 vulnerabilities detected
- ▲ Displays images with incorrect aspect ratio

Passed audits (10)

SEO

These checks ensure that your page is optimized for search engine results ranking. There are additional factors Lighthouse does not check that may affect your search ranking. [Learn more.](#)

Mobile Friendly — Make sure your pages are mobile friendly so users don't have to pinch or zoom in order to read the content pages. [Learn more.](#)

- Tap targets are not sized appropriately — 86% appropriately sized tap targets

Additional items to manually check (1) — Run these additional validators on your site to check additional SEO best practices.

Progressive Web App

These checks validate the aspects of a Progressive Web App. [Learn more.](#)

Fast and reliable

Page load is not fast enough on mobile networks

- ▲ Your page loads too slowly and is not interactive within 10 seconds. Look at the opportunities and diagnostics in the "Performance" section to learn how to improve. ▼
— Interactive at 10.1 s

- ▲ Current page does not respond with a 200 when offline ▼

start_url does not respond with a 200 when offline ▼

- ▲ No usable web app manifest found on page.

Installable

- Uses HTTPS ▼

- ▲ Does not register a service worker that controls page and start_url ▼

Web app manifest does not meet the installability requirements ▼

- ▲ Failures: No manifest was fetched.

PWA Optimized

- Redirects HTTP traffic to HTTPS ▼

- ▲ Is not configured for a custom splash screen Failures: No manifest was fetched. ▼

Does not set a theme color for the address bar. ▼

- ▲ Failures: No manifest was fetched, No `

- Content is sized correctly for the viewport
- Has a `<meta name="viewport">` tag with width or initial-scale
- Contains some content when JavaScript is not available
- ▲ Does not provide a valid apple-touch-icon

Additional items to manually check (3) — These checks are required by the baseline [PWA Checklist](#) but are not automatically checked by Lighthouse. They do not affect your score but it's important that you verify them manually.
